Industrial Router
UR75

Milesight UR75 is an high-performance industrial-grade 5G router designed for a variety of M2M/IoT applications. Made for high-performance, industrial standard, it has quad-core CPU and cellular module that supports global WCDMA, 4G LTE and 5G sub-6 Ghz NSA and SA network.

Meanwhile, UR75 also supports 5-port Gigabit Ethernet switch, RS232/RS485 serial ports and Digital input/Digital output, which enable users to scale up M2M application combining data collection and high-speed transmission in limited time and budget.

UR75 is particularly suitable for smart grid, digital media installations, industrial automation, telemetry equipment, medical device, digital factory, finance, payment device, environment protection, water conservancy and so on.

### ◆ Ultra Fast Connectivity

- Industrial-grade quad-core CPU ARM
   Cortex-A55 with big memory, providing
   high performance for data transmission
- Global 5G (NSA/SA)/4G LTE network with dual SIM cards for backup between multiple carrier networks
- Dual carrier aggregation (2CC CA) is supported in the 5G Sub-6GHz, enabling wider signal coverage with superb download speed up to 4.67 Gbps
- Plug& play, supply lightning transmission via Gigabit Ethernet ports or USB Type-C interface
- Support Wi-Fi 6, allows 2.4G & 5G dual band concurrent connections up to 1.8
   Gbps download speed

# ◆ Industrial-Grade Design

- Wide operating temperature range from -30°C to 60°C and industrial design for harsh environment
- Rugged enclosure with IP30 protection, optimized for DIN rail or shelf mounting.
- Equipped with I/O, serial port, GPS for industrial transmission applications
- 3-year warranty included

## Security & Reliability

- Automated failover/failback backup among Ethernet, Cellular (dual SIM) and Wi-Fi
- Secure transmission with VPN tunnels
   like IPsec/OpenVPN
- Embedded with hardware watchdog to automatically recover from various failures, ensures the highest level of availability
- Equipped with multiple security protection measures such as ACL, DMZ, SYN-Flood protection, and data filtering to ensure that the network is secured.
- Support policy routing and NAT for more secure intranet access

#### ◆ Ease of Maintenance

- DeviceHub provides easy setup, mass configuration, and centralized management of remote devices.
- The user-friendly web interface design and more than one option for upgrading. helps the administrator to manage the device easily
- Support multilevel user authorities for security management
